

## Log In Details

### School Email

To be able to access all the computer infrastructure within the UTC you will need login details, these are assigned to you for the duration of your stay at the UTC. Your profile comes with network storage so all computers have the ability for you to access your work and files.

Your login details are in the following format:

**Username:** forename.surname

**Password:** Password1

You will be prompted to change this at first login.

At the UTC all students have an email account for correspondence within the UTC, this can be used to contact teachers, submit work and join various groups to help with collaborating with other students.

**Your email address:** forename.surname@energycoastutc.co.uk

Please note that the any misuse of the computer systems within the UTC will result in user privileges being revoked.

If any issues should arise, please don't hesitate to report them to IT Support who will investigate as soon as possible.

### SIMS ParentApp

The SIMS ParentApp can be downloaded from your App Store. You will receive an activation email during the first half term which will then link the app to an existing online service (gmail, Hotmail, Facebook etc.). This will enable you to view details of your child's attendance and behaviour as well as viewing their timetable and allowing you to inform us of any changes to your contact details.

It is very important that we have an up to date email address on file to allow access to this service. Your child's report will also be published online and you will be notified that this is available by email.

### Accelerated Reader

Accelerated Reader is an online learning platform which aims to encourage reading through the use of quizzes, feedback tools, independent learning, and much more to help develop students' reading ability by building vocabulary and literacy skills. Your login details will be provided in September.

### Sparx Maths

Sparx is an online learning platform which uses videos, online assessments, feedback tools, independent learning, printable worksheets and much more to help develop students' mathematical skills. Your login details will be provided in September.

### Unifrog

In keeping with our commitment to provide students with outstanding careers guidance and tailored support when choosing their next step after school, we will now be using Unifrog, an award-winning,

online careers platform. All students will have access to this excellent website.

Unifrog brings into one place every university course, apprenticeship, and college course in the UK, as well as other opportunities, such as School Leaver Programmes, MOOCs and every college at Oxford and Cambridge. This make it easy for students to compare and choose the best university courses, apprenticeships or further education courses for them.

Additionally the platform helps students write their personal statement, applications and CVs by guiding them through the process and allowing teachers to give live feedback.

Students access the tool for the first time using a sign-up code which is unique to their form group. They then login using their email address and chosen password and they can do so from any computer, tablet or smartphone. We would encourage you to use the platform with your child so you can support them through the process of deciding their next steps. The sign up code will be provided to new students during the first week of term. Existing students should login using the username and password they created last academic year – forgotten passwords can be reset at the login screen.

Please see your Form Tutor with any issues.
